

Cost
A1
step of limiting the network management actions to a predetermined set of actions based upon an authorization level.

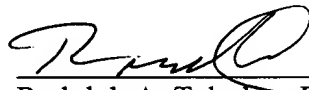

28. The computer data signal embodied in a carrier wave of claim 27 that when executed by a processor causes the processor to further perform the steps of generating menus corresponding to the predetermined set of actions and displaying the menus on the wireless device.

REMARKS

Prior to an action on the merits in the above-identified application, Applicant respectfully requests that claims 22-28 be added and considered by the Examiner. No new matter is being added by these claims.

The Examiner is invited to contact the undersigned at the number provided below to discuss this Preliminary Amendment or any other issues so as to expedite issuance of the expected patent.

Respectfully submitted,

Rudolph A. Telscher, Reg. No. 36,032
